**Give Thanks
With Nature's
Beautiful
Flowers**

Thanksgiving marks the beginning of what I think is our season to take stock of the year and to be thankful for all we have. We truly live in a great country and at a great time. Just look around the world and you can see how fortunate we are.

With Christmas and Chanukah and all the celebratory winter holidays, we are given the opportunity to connect with each other through traditions and gifting. My family has enjoyed over 84 holiday seasons of watching the power of flowers and gifts to bring people closer and spread so much joy.

It is the most magical time at Bayport Flower Houses, our selection is outstanding and there truly is something for everyone. When it comes to decorating for each holiday, our designers create the most wonderful designs to fit every style to make your home glow. Stop in and feel the warmth...

We'll be here... Happy Holidays! ~Karl

Brazos Walking Sticks

Each walking stick is individually crafted from the finest woods including sassafras, hickory, sweet gum, iron bamboo, and many other exotic and native trees. Each walking stick is handcrafted by artisan craftsmen in Central Texas not far from the Brazos River. Before each custom stick is created, the raw wood blank is carefully inspected for hidden flaws that might affect the structural integrity of the custom wooden walking shaft. Only the raw blanks that show the highest strength are chosen for use in our walking sticks. Most of the walking sticks have handles shaped directly from the wood blank; others -- such as our Shepherd's Crook -- are slowly bent to take on a distinctive crook shape. Once shaped and sanded the custom stick is ready for the finish. Depending on the style of stick, a clear or tinted finish is applied. The resulting finish highlights the natural beauty of the wood. .

ELEGANT GARDEN DESIGNS - RUSTY Birds

In 2011, Jay and Madeleine had a vision to turn their love of birds and other garden and woodland inhabitants into delightful, engaging, rustic metal silhouettes to ornament garden and home. Each hand-crafted design reflects personality as well as species-specific traits. Rusty Birds are charming and playful bird silhouettes that can be mounted on nearly any surface. Perched on a fence post, tree branch, bird feeder, or window sill, these delightful figures will add rustic charm to any garden. In the home, they are unique additions to the top of a door, a fireplace mantel, a shelf, or a table.

Whether your decorating greens are outside or inside, the dryness of winter weather is it's greatest enemy. So keep it moist. When we custom make our wreaths, we are sure to treat

POINSETTIAS For the Holidays

The poinsettia, *Euphorbia pulcherrima*, a popular potted plant at Christmas time, provides effective color in the home decor during and after the holiday season. The newer poinsettia cultivars are long-lasting in contrast to the cultivars available a few years ago.

The true flowers of poinsettias are inconspicuous parts in the centers of the colorful bract clusters. The bracts can be red, pink, cream, or white. New for 2016 include the Princettia - Princettia® is a collection of entirely new euphorbia hybrids that are captivating consumers all over the world. Four beautiful shades of pink make them a perfect fit as a gift plant.. In total, we have over 20 varieties. Poinsettias should be in prime condition for decorative use in the home, office, etc. They should be well-shaped plants exhibiting dark green foliage with bracts free from defects.

Watering: The soil in which poinsettias grow should be kept moist at all times, but not excessively wet. Apply water when the soil surface begins to feel dry and apply enough to the surface until it runs out of the drainage hole. For best results, never allow the foliage to wilt between applications of water.

Avoid placing poinsettias in areas where air movement from windows, doors, fans, or radiators exists. Placement in such areas will cause rapid water loss from the foliage and bracts resulting in the inability of the roots to absorb a sufficient amount of water to offset wilting, thus causing premature flower, bract, and leaf drop.

Re-blooming: It is a wonderful accomplishment to have poinsettias re-bloom in the home. Following the last frost in the spring, move the plants outdoors to full sunlight. Prune two or three inches from the end of each stem. The plants will develop a large amount of new growth during summer. To turn color, bring indoors in early September into bright sunlight but do not let poinsettia see artificial light after the sun goes down. Only natural daylight from September - December.
